GRS ConDuct

Conduct Mesh for Vector Mapping under single-ply membranes (EFVM)

Our lightweight aluminum mesh lies flat to the decking or coverboard.

Follow these steps to apply:

- 1. Apply adhesive by roller to coverboard.**
- 2. Roll Conduct Mesh down into adhesive.**
- 3. Re-apply adhesive with roller on top of Conduct Mesh layer before placing single ply membrane.**

Thin wire gauge mesh has very little memory and is very easy to handle!

Roll size: 6' x 300' (1,800 square feet per roll)

Product ships from Glenview, IL and Nashville, TN
