

Product Data

Available Sizes:
4' x desired length <12'

100% recyclable

Thicknesses: 6mm,
8mm, 10mm, 16mm

Cold bending
minimum radius:

6mm: 3' 5"

8mm: 4' 7"

10mm: 5' 9"

16mm: 9' 2"

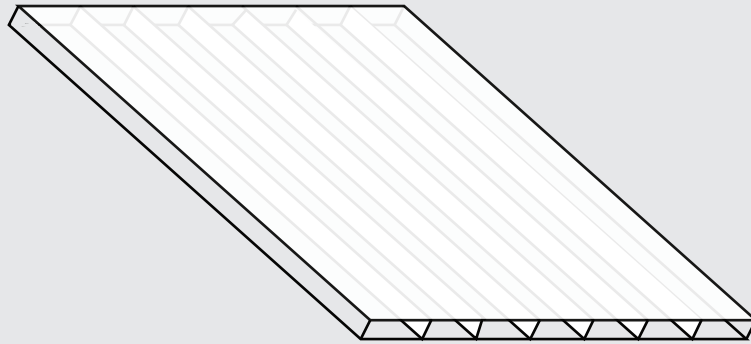

Made in USA

Polygal

Polygal, double- or triple-walled polycarbonate sheet, is a lightweight option used to create a rigid backing in a green wall system.

Use Polygal to create customized cold frames and extend your growing season.

Use Polygal to create a strong, rigid backing for living wall systems. These sheets can also be used to create curved backings when held in place with a frame. These multi-wall sheets are lightweight, highly flexible, and yet nearly unbreakable.

If Polygal has been fully punctured (i.e. if staples or screws go through all walls) the product is no longer waterproof.

This product is available in 4' widths, cut to the desired length and priced per square foot.
